About Me

Full Stack (MERN) Developer with hands-on experience building scalable applications using React.js ,Node.js ,Express.js and MongoDB. Skilled in developing RESTful APIs, implementing secure authentication (JWT, cookies), and managing state with Redux Toolkit. Proficient in creating responsive UI with Tailwind CSS and optimizing performance across frontend and backend.

Skills

Frontend : HTML , CSS , JavaScript , Tailwind , React.js , Redux Toolkit , Responsive Design

Backend : Node.js , Express.js , RESTful APIs , Authentication (JWT)

Database : MongoDB , Mongoose

Tools & Technologies : Git , GitHub , Postman , ImageKit.io , VS Code

Projects

Movie Ticket Booking

CINEBOOK

Developed a full-stack Movie Ticket Booking web application using the MERN stack . Implemented features such as user authentication, movie and show listings, seat selection, online payment gateway integration, and booking confirmation. Designed a responsive user interface with smooth navigation and a real-time booking experience. Managed backend APIs, database operations, and deployment of both frontend and backend services.

E-commerce Website

Developed a full-stack E-commerce web application using the MERN stack. Implemented features such as user authentication, product management, shopping cart, and order status tracking. Integrated Razorpay payment gateway for secure online transactions and built an admin panel for managing products and users (add, update, delete, role management). Utilized Cloudinary for efficient image storage and handling.
